

SUMMARY

- Passionate about computer science and participating in its future innovation/advancements.
- Desire to be accountable for contributing to the team's performance as I was in previous internships.
- Proficient understanding of web development, databases, and mobile development.
- Capable of handling tasks and performing at industry standards.
- Collaborative, analytic, and learning mindset.

SKILLS

- **Front-End:** HTML, CSS, Javascript, React, Angular
- **Back-End:** C/C++, Java, Python, MyBatis, Javascript, Express.js
- **Database:** PostgreSQL, MySQL
- **Android:** Kotlin, Flutter, Dart
- **Tools:** Nginx, Git, VSCode, Node.js, L^AT_EX

WORK EXPERIENCE

- **Saninco Technologies Inc.** North York, ON
Software Developer Intern *June 2019 - August 2019*
 - **Project:** Telecom Expense Management System (TEMS) is a SaaS aimed at helping large enterprises manage telecom expenses. The key modules include, invoice management, and expense validation.
 - **Technologies:** HTML, CSS, Javascript, JQuery, Struts 2, MyBatis, Java
 - Implemented optimizations in paging of the wiki using Ajax.
 - Developed sorting and filtering features on android app through MySQL queries.
 - Participated in full SDLC process including: reading requirement document, attending requirement meetings, coding in accord with framework, unit testing, and collaborating with QA team for bug fixes.
- **TMG Analytics Inc.** Toronto, ON
Software Developer Intern *June 2018 - August 2018*
 - **Project:** DirectMailBox is a cloud-based service which allows clients to send mail to a selection of potential customers that may be filtered down through specifications regarding the status of relocating residents.
 - **Technologies:** HTML, CSS, Javascript, JQuery, SpringMVC, MyBatis, MySQL.
 - Built and implemented UI components for several pages using JQuery.
 - Improved load times for multiple pages by optimizing MySQL indexing.

PROJECTS

- **Personal Website** Spring 2019
React, Javascript, HTML, CSS, Express.js
 - Created a single-page application to display personal projects and basic information
 - Developed proficiency with modern design practices, such as component based design with React
 - Used Node.js and Express.js to create a simple backend API for emailing
- **Java Bomberman** Spring 2018
Java, Swing
 - Created a barebones remake of the original 1985 Bomberman in Java
 - Utilized Swing API to create simple user interface

EDUCATION

- **University of Toronto, St. George** Toronto, ON
Honours Bachelor of Science, Candidate for Computer Science Specialist *Sept. 2019 - May. 2023 (Expected)*
